Modern Apprenticeships in Engineering

Interested? What do I do now?

Angus Training Group Ltd:-

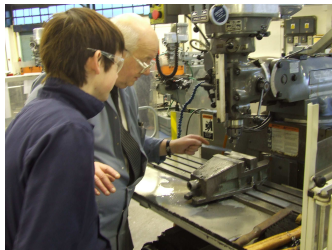

is an employer led organisation committed to delivering high quality training to meet the employer needs of the engineering industry.

Established in 1966 the customised training centre caters for various disciplines in the engineering sector. We currently train for the vast majority of engineering employers, large and small in the area and also a number of organisations based in Aberdeen

Kevin “ I have gained experience at Angus Training Group and it has prepared me for work with my employer ”

Rory “ A great opportunity for anyone looking for a career in engineering in a working environment”

Aaron “ Angus Training Group is a solid base for anyone interested in engineering in a good working environment”

Entry Qualifications

Craft

A good school record with preferably a technical background but not essential.

Technician

A minimum of 3 acceptable Standard Grade (now National 5) passes preferably including Mathematics, English and/or Physics plus Technical subjects would be an advantage.

Apprenticeship Content

The Modern Apprenticeship consists of a period of Off-the-Job training, Core Skills, to SCQF Level 5, Work Based training and further education. On successful completion candidates are awarded a Certificate of Modern Apprenticeship.

Lloyd” ATG arranged an interview with Halliburton who offered me an apprenticeship

Sarah “ After my apprenticeship I am now based in the Design Office and help train new starts”
